TR - Seramik ve taşıyıcı parçalar kendi içinde yüke dayanım standartlarına göre test edilmiştir. Ürünün duvara bağlantısı, duvar tipine özel dübel seçimi gerektirir.

EN - The ceramic and support brackets are tested according to load resistance standards in itself. Connection of the product to the wall requires the selection of a rawlplug.

DE - Sanitärkeramik sowie Haltewinkel werden hinsichtlich Ihrer Belastbarkeit gemäß gängiger Standards getestet. Für die Wandmontage muss das Befestigungsmaterial bei Bedarf den örtlichen Gegebenheiten angepasst werden.

FR - Le produit céramique et les équerres fournis sont testés conformément aux normes de résistance à la charge. La pose du produit nécessite le choix d'une fixation (chevillage) appropriée par rapport au support.

RU - Керамические изделия и опорные элементы подвергаются обязательным испытаниям на максимально допустимую нагрузку в соответствии с требованиями международных стандартов. В зависимости от типа и материала стены, необходимо подобрать соответствующие крепежные элементы для надёжной фиксации опорных элементов к стене (анкеры, дюбели и т.п.)
