

- Suitable for bathroom, balcony and terrace installations.
- For shower areas "V-Flow square with insulation" products are recommended.
- 304 stainless steel cover. PP-C thermoplastic siphon body.
- Water seal for odor prevention.
- EN50 standard outlet connection diameter.
- Easy direction adjustment for outlet connection.

WARNING

- Do not rip off the protective cover film until the whole application is finished.
- Carry out the processes through user guide.
- Adhesives should be applied to both sides (both the product and wall or floor)
- Use cutting and drilling tools which enable to cut steel without damaging product.

POINTS TO NOTICE

- Do not use sharp tools when mounting the tile to the surface.. for example any plastic and rigid or metallic tool.
- Stainless steel needs oxygen. Remains accumulating on the surface make the steel unoxxygenated so it causes corrosion. To avert dirty and dusts, keep surface dry and clean by cleaning often.
- Do not contact bleach or liquids, acid, hydrochloric acid and chemical to clean ceramics that contain chlorine to the tiles long time because they cause blot.
- Stainless steel is a scratchable material. Do not use tough tools and materials. Do not rub with brushes or sponges.
- Use steel polisher creme.
