F	PRODUCT FICHE	
Model	AFC 330 G	
Energy Efficiency Index per cavity EEI of	cavity	95,3
Energy efficiency class		A
Energy consumption (kWh)-Conver	ntional per cycle (1)	0,95
Energy consumption (kWh)-Forced air convection per cycle (1)		0,81
Number of cavity		1
	Electrical	x
Heat source per cavity	Gas	
	Mix	
Usable volume (litres)		72

7768270204 385442436 AB

cavity(kWh/cycle)(electric final energy)EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in fan-forced moc cavity(kWh/cycle)(electric final energy) EC electric ca Energy consumption required to heat a standardised cavity of an oven during a cycle in conventional mode	Regulation No 66/20 ARÇELİK AFC 330 G	28,60 1 x 72
Brand Model Type of oven Free Standing Built-in Mass of the appliance(M) (Net Weight) kg Number of cavity Heat source per cavity Usable volume (litres) Energy consumption (electricity) required to heat a standardised cavity of an electric heated oven during a cycle in concavity (kWh/cycle)(electric final energy)EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in concavity (kWh/cycle)(electric final energy) EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in fan-forced moc cavity (kWh/cycle)(electric final energy) EC electric ca	ARÇELİK AFC 330 G	x 28,60 1 x
Model Type of oven Free Standing Built-in Mass of the appliance(M) (Net Weight) kg Number of cavity Heat source per cavity Gas Mix Usable volume (litres) Energy consumption (electricity) required to heat a standardised cavity (kWh/cycle)(electric final energy)EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in concavity(kWh/cycle)(electric final energy)EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in fan-forced mod cavity(kWh/cycle)(electric final energy) EC electric cavity (kWh/cycle)(electric final energy) EC electric cavity (kWh/cycle) (electric final energy) EC electric cavity (kWh/cycle) (electric final energy) EC electric cavity of an oven during a cycle in conventional model cavity of an oven during a cycle in conventional model.	AFC 330 G	28,60 1 x
Type of oven Free Standing Built-in Mass of the appliance(M) (Net Weight) kg Number of cavity Heat source per cavity Electrical Gas Mix Usable volume (litres) Energy consumption (electricity) required to heat a st cavity of an electric heated oven during a cycle in concavity(kWh/cycle)(electric final energy)EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in fan-forced mod cavity(kWh/cycle)(electric final energy) EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in fan-forced mod cavity(kWh/cycle)(electric final energy) EC electric cavity of an oven during a cycle in conventional model cavity of an oven during a cycle in conventional model.	indardised load in a ventional mode per	28,60 1 x
In Mass of the appliance(M) (Net Weight) kg Number of cavity Heat source per cavity Service of the appliance (M) (Net Weight) kg Heat source per cavity Service of the appliance (M) (Net Weight) kg Mix Usable volume (litres) Energy consumption (electricity) required to heat a st cavity of an electric heated oven during a cycle in concavity(kWh/cycle)(electric final energy)EC electric cavity (kWh/cycle)(electric final energy) EC electric cavity(kWh/cycle)(electric final energy) EC electric cavity (kWh/cycle) (electric final energy) EC electric cavity (kWh	ventional mode per	28,60 1 x
Number of cavity Heat source per cavity Gas Mix Usable volume (litres) Energy consumption (electricity) required to heat a st cavity of an electric heated oven during a cycle in concavity(kWh/cycle)(electric final energy)EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in fan-forced mod cavity(kWh/cycle)(electric final energy) EC electric cavity(kWh/cycle)(electric final energy) EC electric cavity(kWh/cycle)(electric final energy) EC electric cavity(kWh/cycle)(electric final energy) EC electric cavity of an oven during a cycle in conventional model cavity of an oven during a cycle in conventional model.	ventional mode per	1 x 72
Heat source per cavity Gas Mix	ventional mode per	72
Heat source per cavity Gas Mix Usable volume (litres) Energy consumption (electricity) required to heat a st cavity of an electric heated oven during a cycle in co cavity(kWh/cycle)(electric final energy)EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in fan-forced moc cavity(kWh/cycle)(electric final energy) EC electric ca Energy consumption required to heat a standardised electric value for the cavity (kWh/cycle) (electric final energy) EC electric cavity (kWh/cycle) (electric final energy) EC e	ventional mode per	72
Usable volume (litres) Wix Usable volume (litres) Energy consumption (electricity) required to heat a standardised cavity of an electric heated oven during a cycle in concavity(kWh/cycle)(electric final energy)EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in fan-forced mod cavity(kWh/cycle)(electric final energy) EC electric cavity (electric cavity of an oven during a cycle in conventional model cavity of an oven during a cycle in conventional model.	ventional mode per	
Usable volume (litres) Energy consumption (electricity) required to heat a streamly care lectric heated oven during a cycle in co cavity of an electric heated oven during a cycle in concavity(kWh/cycle)(electric final energy)EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in fan-forced moc cavity(kWh/cycle)(electric final energy) EC electric ca Energy consumption required to heat a standardised cavity of an oven during a cycle in conventional model	ventional mode per	
Energy consumption (electricity) required to heat a st cavity of an electric heated oven during a cycle in co cavity(kWh/cycle)(electric final energy)EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in fan-forced moc cavity(kWh/cycle)(electric final energy) EC electric cavity(kWh/cycle)(electric final energy) EC electric cavity of an oven during a cycle in conventional model cavity of an oven during a cycle in conventional model.	ventional mode per	
cavity of an electric heated oven during a cycle in co cavity(kWh/cycle)(electric final energy)EC electric ca Energy consumption required to heat a standardised electric heated oven during a cycle in fan-forced moc cavity(kWh/cycle)(electric final energy) EC electric ca Energy consumption required to heat a standardised cavity of an oven during a cycle in conventional mode	ventional mode per	0,95
electric heated oven during a cycle in tan-forced moc cavity(kWh/cycle)(electric final energy) EC electric ca Energy consumption required to heat a standardised cavity of an oven during a cycle in conventional mode	cavity of an electric heated oven during a cycle in conventional mode per cavity(kWh/cycle)(electric final energy)EC electric cavity Energy consumption required to heat a standardised load in a cavity of an	
cavity of an oven during a cycle in conventional mode	electric heated oven during a cycle in fan-forced mode per cavity(kWh/cycle)(electric final energy) EC electric cavity	
	Energy consumption required to heat a standardised load in a gas-fired cavity of an oven during a cycle in conventional mode per cavity (MJ/cycle) (kWh/cycle)(gas final energy) EC gas cavity (1)	
Energy consumption required to heat a standardised load in a gas-fired cavity of an oven during a cycle in fan-forced mode per cavity (MJ/cycle) (kWh/cycle)(gas final energy) EC gas cavity (1)		
Energy Efficiency Index per cavity EEI cavity		
(1) 1 kWh/cycle = 3,6 MJ/cycle.		95,3
